

# Sara Lee SAP Migration

## Migrating ERP Workload to the Cloud in a Week

### About Sara Lee Frozen Bakery

The Sara Lee Frozen Bakery family of brands offers a stand-out portfolio of culinary-inspired bakery favorites to their Canadian foodservice customers. Deliciously innovative options backed by industry insights ensure their frozen bakery products are the right fit for their customers' operations. Sara Lee Frozen Bakery has partnered with CONTAX Inc. as their SAP professional services partner.

#### THE CHALLENGE

Sara Lee Frozen Bakery was owned by parent company Tyson Foods, but their business has been spun off from that parent company. As a result, Sara Lee needed to migrate their SAP Environment out of Tyson's data centre.

The project was not approved until one week before the date when Sara Lee would no longer have access to the data centre hosting their SAP environment. Typically, migrations of SAP environments are done over a number of weeks, so this accelerated timeline posed a challenge.

#### THE SOLUTION

The migration project team at CONTAX Inc. utilised resources in multiple time zones in order to successfully meet the aggressive timeline required for this migration. The team used AWS tools such as S3, transfer acceleration, and VPC to create an enterprise-grade private network and migrated Sara Lee's SAP workloads into the cloud in a matter of days.

The business users at Sara Lee experienced very little disruption to any core business functions on SAP.

#### THE BENEFITS

##### Speed of Deployment

The tight time frame was managed successfully. The migration took 7 days from start to go-live.

##### On-Demand Pricing Structure

Sara Lee is able to use the services they need without locking them into a long-term commitment.

##### Robust Partner Network

Sara Lee was able to leverage their existing relationship with CONTAX Inc., an SAP and AWS Partner.

#### ABOUT CONTAX INC. AND AMAZON WEB SERVICES

CONTAX is a Gold SAP partner and global SAP consulting services provider. CONTAX is an AWS Select Partner and an AWS Solution Provider.

Moving SAP workloads from on-premises to AWS is an easy lift-and-shift optimization, enabling enterprises to become more agile and cost-effective, and streamline the adoption of emerging technologies, such as IoT and machine learning.
